Response to Amendment

1. Based on applicant's amendment, filed 1/29/2007, see page 5 through page 7, of the remarks, with respect to amended independent claims 1 and 10, have been fully considered and are persuasive, upon further consideration the rejection of 103(a) for claims 1-120, are hereby withdrawn.

The claims 1-20 are allowed.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance.

This invention relates generally, to a method and system for computer-aided detection (CAD) of volumetric images, specifically for detection of polyps indicative of colon cancer in computed tomography imagery.

Based on applicant's amendment, claim1 representing the new claim 10, the closest prior art of record (Vining and Summers) references teaches, "system and method for automatically analyzing three-dimensional renderings of structures having lumens for potential abnormalities", but do not teach or suggest, among other things, "performing a first spherical summation operation as a function of voxel locations in set of images over a spherical region of a first radius to provide a first spherical summation value and performing a second spherical summation operation as a function of said voxel locations in set of images over a spherical region of a second radius to provide a second spherical summation value, computing a ratio of said first spherical summation value to second spherical summation value and comparing said ratio to a threshold value and creating a set of detection images by turning voxels ON which exceed said threshold value.

These key features in combination with the other features of the claimed invention are neither taught nor suggested by (Vining and Summers) prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
